

Childcare Costs and Economic Strain Across U.S. States

Teresa Ferrill

***Data Presentation
and Visualization***

April 26, 2026

***Understanding cost differences
and their impact on affordability***

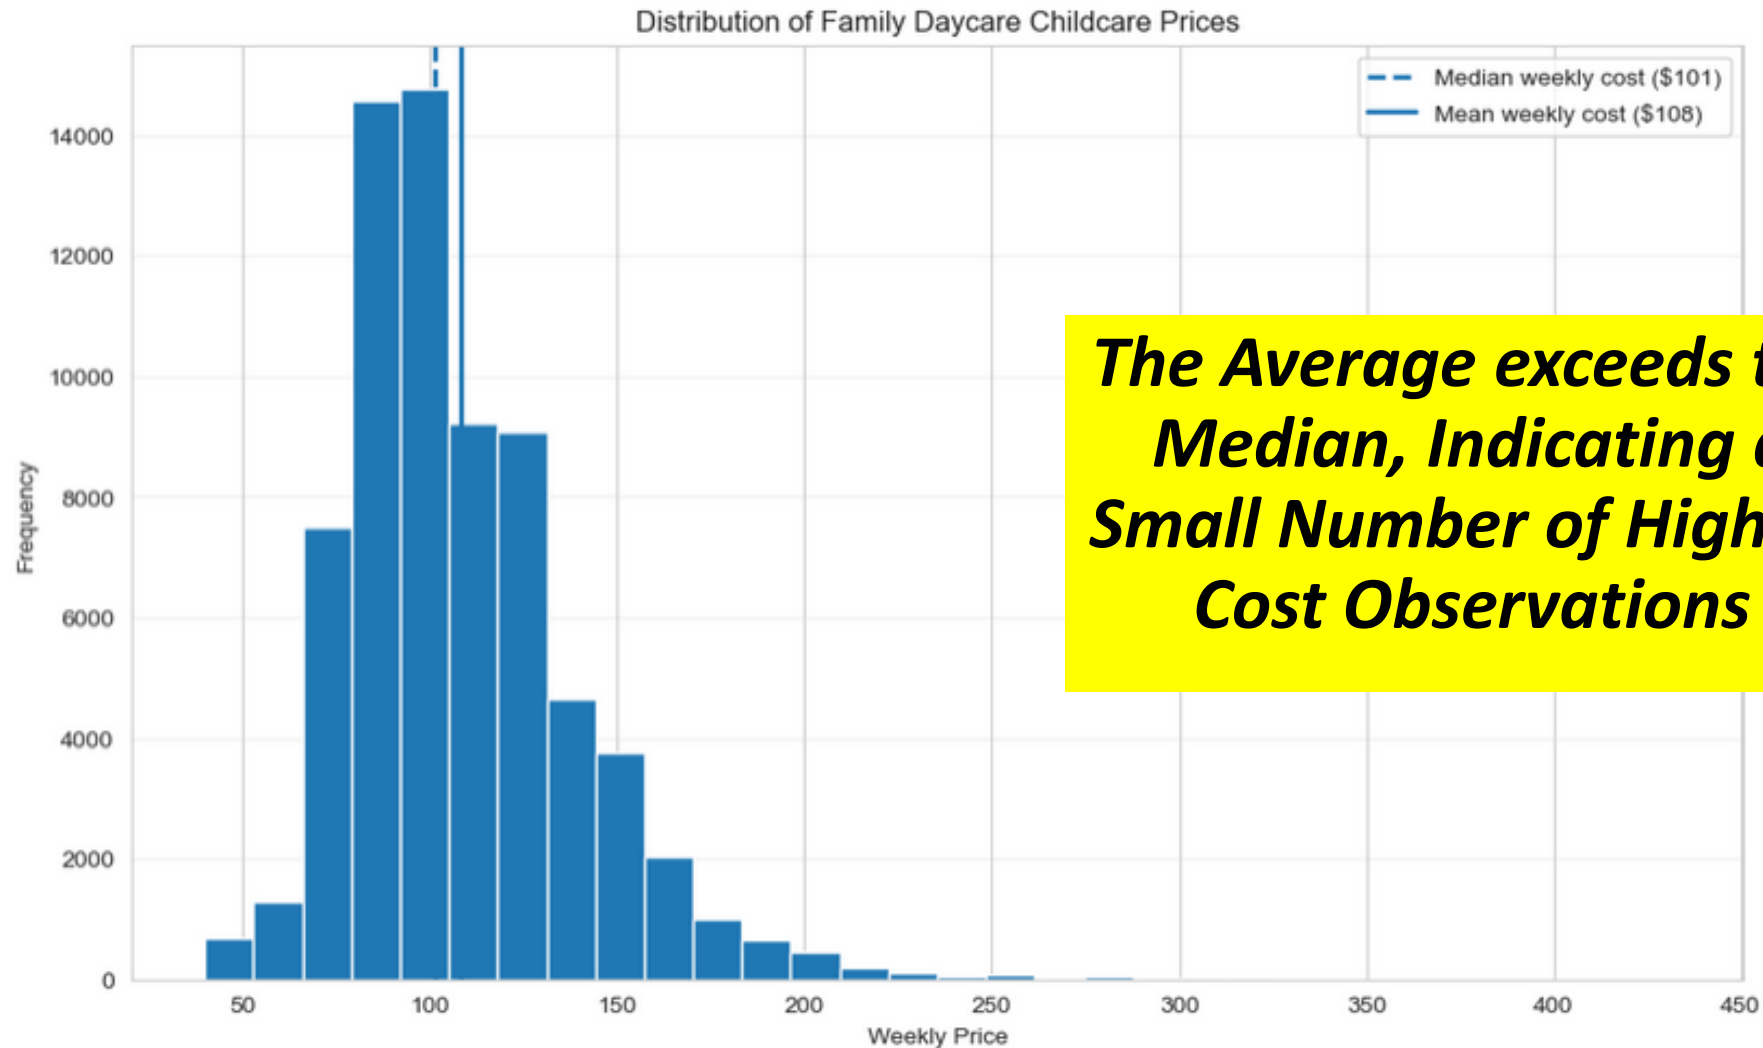

Childcare Costs Impact Workforce Participation

- Childcare is a major household expense
- That Varies Widely
- Can impact workforce participation

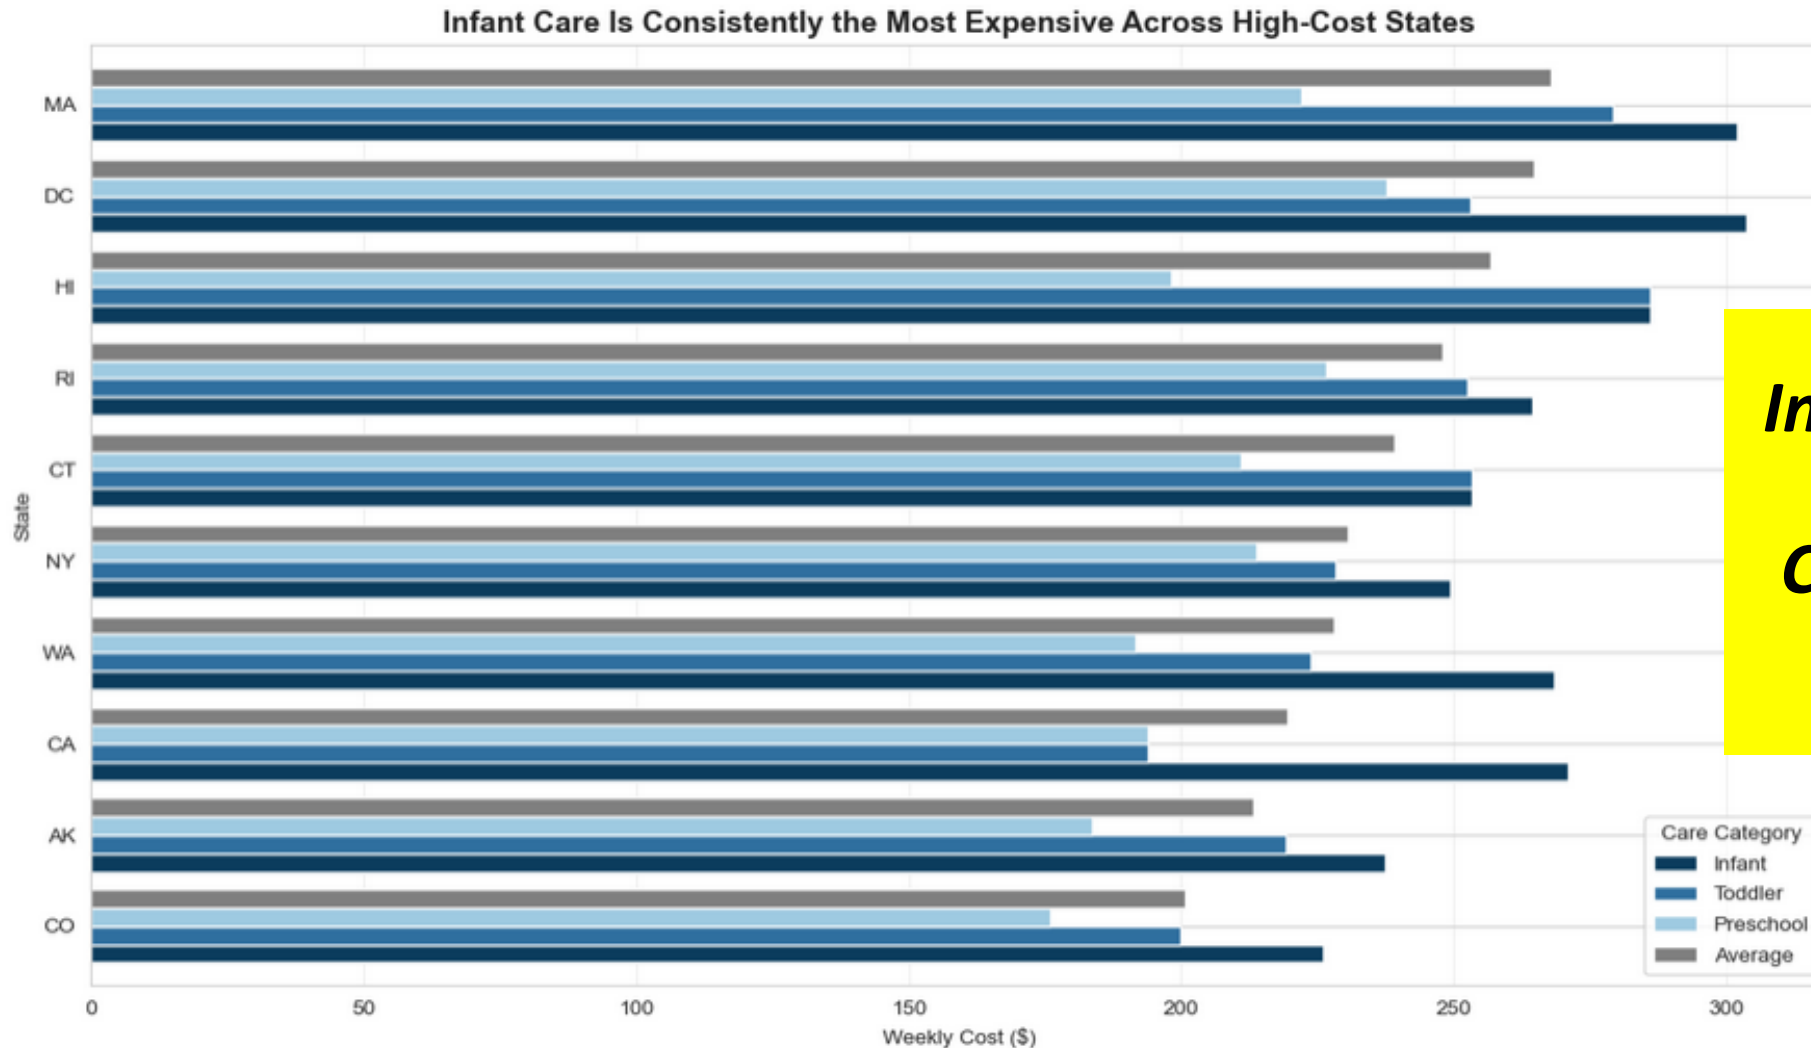

(U.S. Department of Labor, 2023)

Family Daycare Costs Are Around \$100 per Week, with Some Higher-Cost Outliers

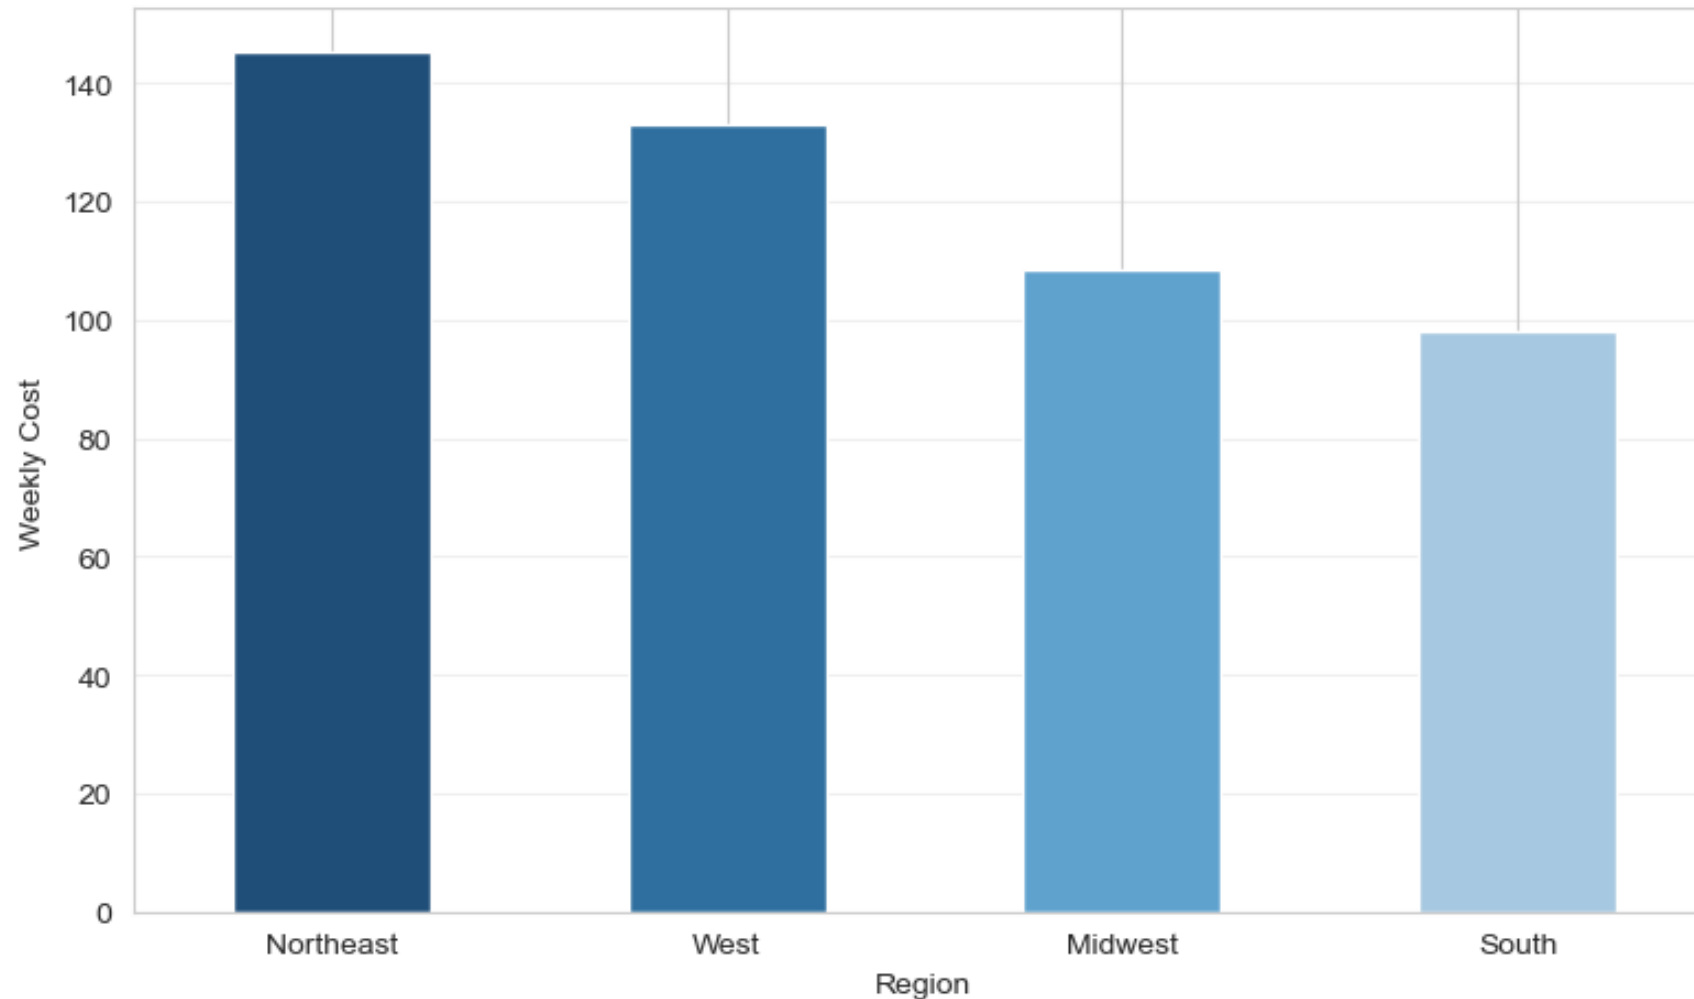

Infant Care is Consistently the Most Expensive Across High-Cost States

***Infant Care Represents
the Highest Weekly
Cost Across High-Cost
States***

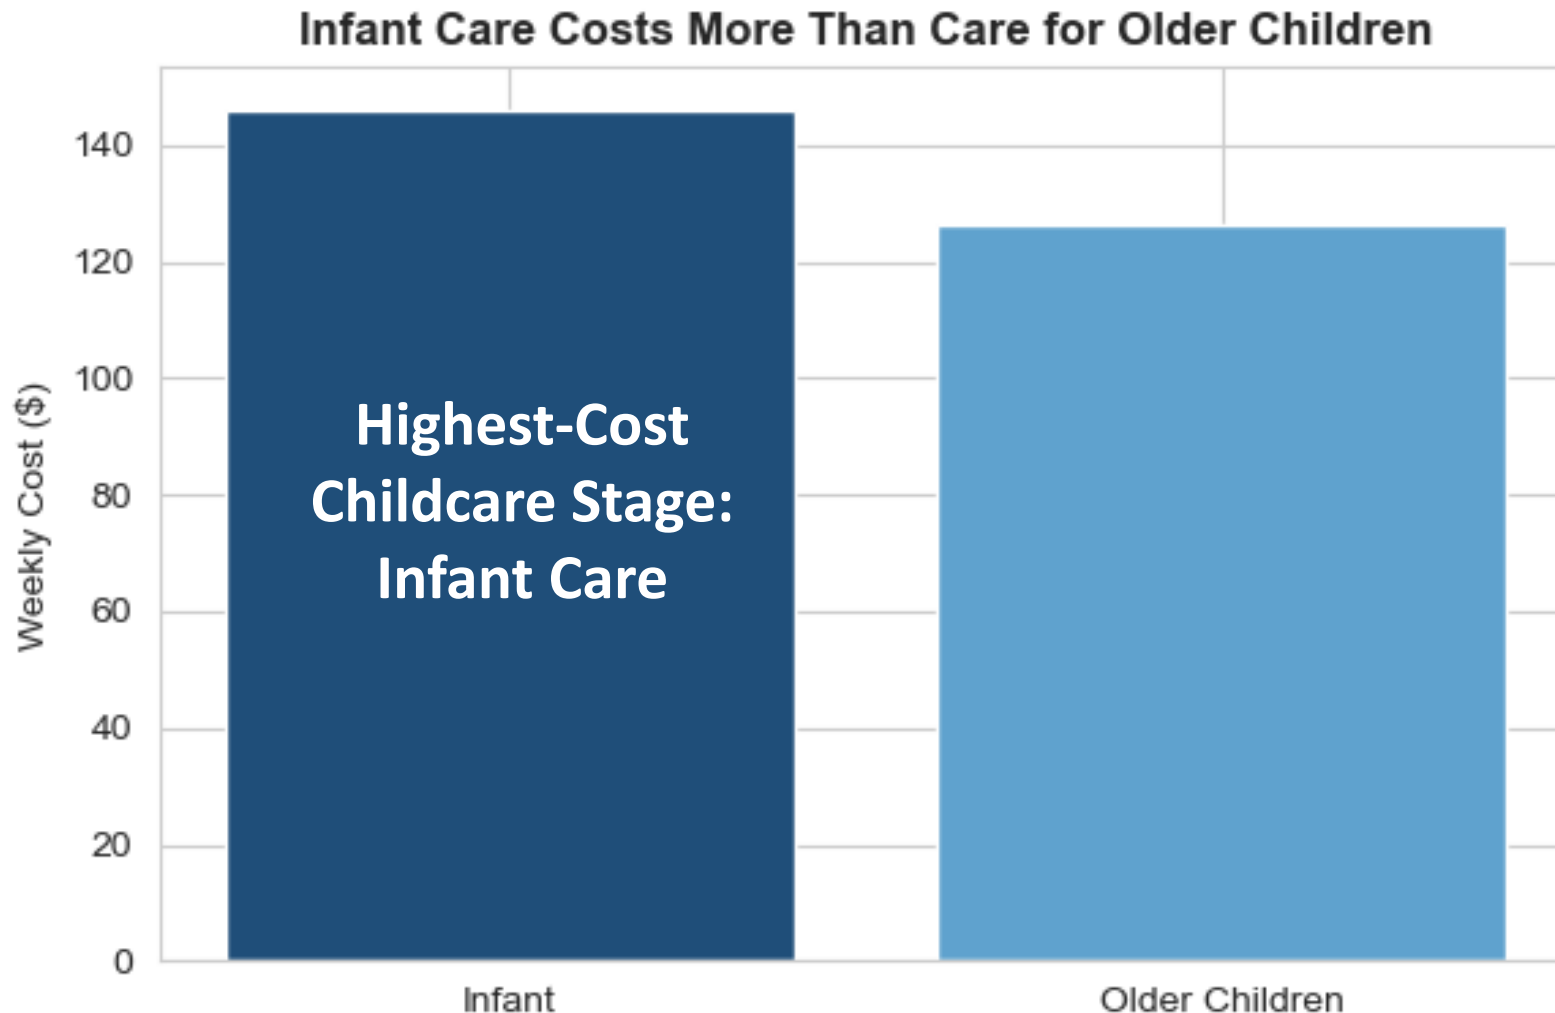

Childcare Costs Differ Across Regions

Family Daycare Cost by Region (Highest to Lowest)

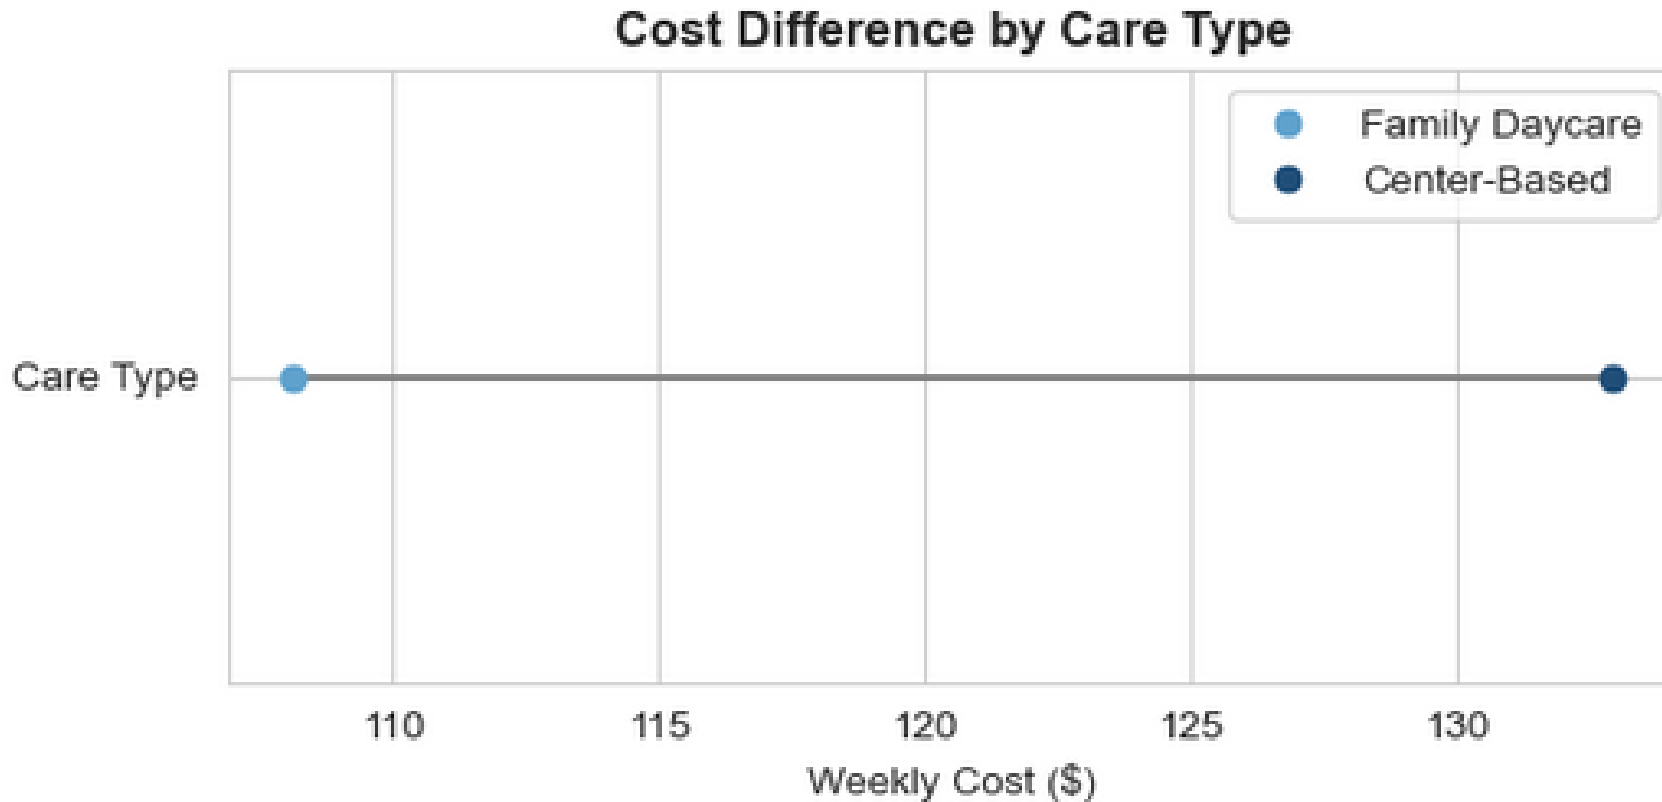

***Family Daycare
Costs are Highest in
the Northeast and
Lowest in the South***

Infant Care is the Most Expensive Age Group

Infant Care Costs are Approximately 15% Higher than Toddler and Preschool Care

Care Type Creates a Meaningful Cost Gap for Families

**Center-Based
Care Costs
More than
Family
Daycare**

+20-25% Higher Cost for Center-Based Care

Multiple Factors Drive Higher Childcare Costs

- Costs vary by state and region
- Infant Care is the most expensive
- Center-based care increases overall cost

COMBINED COST DRIVERS

– LOCATION, AGE, AND CARE TYPE –

CREATE FINANCIAL STRAIN FOR WORKING FAMILIES

***Childcare Costs May Impact Workforce
Participation and Financial Stability***

(Child Care Aware of America, 2022)

Key Takeaways and Implications

- Childcare costs vary widely across states and regions
- Infant care and center-based care drive higher costs
- Childcare costs may act as a barrier to workforce participation

Addressing childcare affordability is critical to supporting workforce stability and economic participation
